Software Engineer

Adaptable, motivated and personable software engineer with 6 years experience over a range of technologies and platforms in an enterprise environment focusing on web applications & content management.

Passionate about technology with an eye for detail, strong interest in design/UX and always keen to learn more. Currently seeking an opportunity to join like-minded individuals to create beautifully coded, exciting web sites and applications using the latest technology has to offer.

Experience

Joined NAB as a graduate out of Melbourne University in 2007. Have since worked with a variety of technology teams gaining experience across the full spectrum of the SDLC from initial scoping, estimation and requirements elicitation to development, release and support.

05.12 – Now

Nab Broker Technology, **web & c# developer**

- Involved in the development of administration application for mobile c2c payments platform using AngularJS.
- Developed HTML/CSS & Javascript front end for nabbroker.com.au refresh based on agency supplied desktop design. Delivered cross-browser, mobile/tablet ready, responsive front end.
- Integrated HTML/CSS templates into Open Text Red Dot CMS & performed cross-browser testing on various platforms including; IE6+, Chrome, OSX Safari 5+, FireFox, iOS 4, Android 2.2.
- Development for various C# .NET websites and applications.

04.11 – 05.12

Business Intelligence Solutions Centre, **b.i developer**

- Worked on pilot project introducing Oracle Business Intelligence Enterprise into the organisation, developing standards and processes for use of OBIEE within BISC.
- Developed self-service universes & automated reporting for business stakeholders using Business Objects Webi analytics tools.

02.07 – 04.11

Web Applications – Intranet Portal, **graduate/analyst programmer**

- Lead redevelopment of J2EE Business Objects Viewer web application to implement upgrades involved with integrating with Business Objects XI Release 3.
- Worked on implementation of new visual design as part of enterprise intranet refresh.
- Developed J2EE intranet video delivery portlet & sub-site to replace terrestrial television delivery of NABtv, leveraged existing file delivery infrastructure to minimise network impact.
- Development and support for enterprise intranet based on IBM WebSphere Portal, IBM Web Content Manager, Autonomy Search, Confluence Wiki and other J2EE web applications.

2002 – 2006
1998 – 2001

Education

BEng (Hons) in Software, BCom in Accounting, Melbourne University
Victorian Certificate of Education, TER of 98.70, Melbourne High School
